PROJECT & COST MANAGEMENT

Way ahead

CATERING TO CLIENTS' needs

IN THE CONSTRUCTION AND PROPERTY INDUSTRY

SteadWay is a well-established, independently owned construction and property consultancy based in Berlin and working on projects throughout Germany and the surrounding countries in Europe.

Our growing team of Project and Cost Managers are dedicated and committed individuals who take full ownership of the projects under their control from the outset of a commission. We employ experienced and thoroughbred Project Managers and are one of the few consultants in Germany to consistently utilise Quantity Surveyors as specialist Cost Managers on our projects. At SteadWay we fundamentally believe in having the critical mass and specialist skills to provide project and cost management services on any construction project.

We are currently working on some of the most exciting and challenging construction projects in Germany. We have experience of working on projects of all asset classes and represent equally tenants, developers, landlords, funding organisations and the like. Our commissions range from small refurbishment and repositioning projects through to major new build developments and masterplanning projects. We are convinced that our growing portfolio and constant exposure is highly beneficial to clients requiring a high quality, cost effective and speedy delivery of a construction or fit-out project.
